THE "AUREOLE" SET

OF FOUR NEW

GERANIUMS

for price and description of these new Beauties see page 1.

The New Hardy Climbing Rose

Dorothy Perkins

(SEE COVER.)

Is Justly Called the "Pink" Crimson Rambler, and is a Beautiful Companion to This Well-Known Favorite.

This lovely Rose is the latest addition to our splendid list of Hardy Climbing Roses. We really can say no more in its praise when we state that it is just like the well-known Crimson Rambler, except in color, which is a most beautiful shell pink and holds a long time without fading. Even when the flowers commence to fade the color is still pleasing, being then a lovely deep rose.

The Flowers are of large size for this class of Rose, usually about one and one-half inches across; are borne in clusters of from ten to thirty and are very double; the petals are very prettily rolled back and crinkled; the buds are remarkably pretty, being pointed in shape and of just the right size for the button-hole.

Hardiness. In this important point nothing more could be desired. Two unusually severe winters failed to injure the plants in the least although during one of them the temperature went as low as 20° below zero and there was not the usual snowfall to protect them.

In Vigor the "Dorothy Perkins" is all that can be desired, making in a single season strong, lusty shoots, often of ten to twelve feet in height.

In Habit of Growth it is decidedly upright, having exactly the habit of the now well-known Crimson Rambler. It is therefore especially adapted for planting as a companion rose to Crimson Rambler.

Fragrance. The flowers are very sweetly scented, a characteristic not possessed by most other Roses of this class.

The Foliage is of a deep green, of thick leathery texture, and remains on the plant in perfect condition till well on into the winter, making it almost an evergreen variety.

Price, for strong, well-rooted plants, one-year-old, 20 cents each, three for 50 cents, two-year-old plants, 50 cents each.

THE STAR BEGONIA (See Cover)

Begonia, Ricinfolia Maculata, or Star Begonia

The leaf is very large, will average a foot or more in diameter, and is separated into seven or nine points, carried on thick, long stems, eighteen inches or more in height. Color rich brown, blotched with pale green, surface velvety. In bloom it is magnificent, the panicles composed of great numbers of individual pink blooms, are lifted high and spray-like quite clear of the foliage. Wonderfully effective. **Price, nice strong plants, 25c each.**

MAGNOLIA FUSCATA (Banana Shrub)

A most desirable greenhouse shrub, succeeding admirably as a window plant. It produces its brownish yellow flowers in the greatest profusion during late Winter or early Spring months. These are of the most exquisite fragrance, similar to a ripe banana. **Strong Plants, 40 cents each.**

An old favorite greenhouse shrub, succeeding admirably as a house plant, producing small white flowers which are of the most exquisite fragrance, continuing to bloom almost the entire Winter. **Nice strong plants, 35 cents each; larger plants 50 cents.**

IF PLANTS ARE TO BE SENT BY EXPRESS, ALWAYS MENTION BY WHICH EXPRESS COMPANY YOU WISH THEM SENT.

We believe the above offers to be the best and most liberal ever made by any firm, and we fully realize that it is going to cost us a large sum of money, but it will be to our customers benefit, and we believe our patrons will so far appreciate our efforts to supply them with the best and cheapest plants that they will tell their neighbors and flower-buying friends about us and our liberal terms, interesting them in our behalf, thus increasing our business in your locality.

WHEN BEST TO ORDER Order early, even thongh you are not ready to receive your plants. We will get up your order, set it aside, and ship whenever you say. This will insure you receiving the first pick of the stock, before it is broken. Be sure to sign your name, give address, and always sign your name the same. Many orders reach us, lacking either or both. We have a number of unidentified orders on hand.

REMITTANCES Should be made either by money order, express order, bank draft or registered letter. By remitting as above stated, will be at our risk. United States postage stamps can be sent, if not convenient to remit by any of the above methods. Denominations of 5 and 10 cents preferred. We guarantee all plants to reach their destination in good growing condition; if they do not arrive in such state, please write us promptly just what is wrong or what is missing, and we will give it prompt attention, and replace such plants that arrive in bad condition. However, when plants die some time after they are received in good condition, it is no fault of ours, and we should not be asked to replace them.

MISTAKES We make them, but when we do we are always ready and willing to correct them. We guarantee absolute satisfaction to every purchaser. If you think we have made a mistake, tell us so good-naturedly if you can, if not, write us anyway. Do not complain to your neighbors and friends until after you first give us an opportunity to correct mistakes that are usually made by employes, as it is impossible for either member of our firm to attend to all orders, but we will personally give attention to all complaints.

CORRESPONDENCE If you find occasion to write us, please make letters short and right to the point, and always sign your name the same. Do not write your letter on the order sheet, but use separate paper.

PROMPTNESS We fully realize the importance of promptness, and nothing would please us better than to ship all orders the same day we receive them. We always make a special effort to do this so long as we can, but in April and May, during the extreme rush, it is impossible for us to do so. We would suggest that from the 10th of April to the last of May you send in your orders a few days before you want your plants. By doing this you will avoid any possible delay during our busiest months, and remember that it takes orders from two to five days to reach us, and the same length of time for shipment to reach you. Use our order sheet, and help us all you can in this way. We have just added six large Greenhouses to our already extensive plant, with increased packing facilities, and are in better shape than ever to handle orders promptly.

SPECIAL NOTICE As our Nursery is a separate and distinct department from our Greenhouses, it is necessary that all Fruit Orders be shipped direct from the Nursery, and we therefore ask customers to kindly keep Fruit Orders separate from the Plant and Seed Orders. Fruits will not be shipped with other plants.

Prices on Fruits are placed very low and we cannot allow them to be included in Club-Rates nor can they be taken as premiums. Price per 100 will be given on application.

OUR FALL CATALOGUE

ON THE FIRST OF SEPTEMBER we issue a Catalogue of Bulbs and Plants for Fall Planting and Winter blooming, such Hyacinths, Tulips, Narcissus, Crocus, Ixias, Freesias, etc. We mail this Catalogue to all of our customers of this and last year, and we also send it free to others who wish to order.

THE GRAND NEW PIERSON FERN (NEPHROLEPIS PIERSONII)

The character of the frond is well shown in the photograph on this page, although the picture conveys bnt a slight idea of the grace and beauty of the feathery, plume-like fronds, which more nearly resemble the graceful ostrich plume than anything else in nature to which we can compare them. One has to see a plant in growth to appreciate its beauty and value. The fronds grow broad and heavy, measuring at least six inches across when fully developed, increasing in beauty as they develop. On account of the weight of the foliage, the plant assumes an exceedingly graceful appearance, and, owing to the fullness of the fronds. even small plants are well furnished, making much more symmetrical and beautiful plants than the Boston Fern. The divided pinnæ, or the miniature fronds, keep growing constantly, showing two distinct shades of green, the ends being a light green, while the center and main part of the fronds show a dark, rich shade, the contrast producing a very beautiful effect, greatly enhancing the beauty of the plant. It is wonderfully valuable, not only on account of its beauty, but also on account of its ease of culture, hardiness, and general adaptability. It has all the free-growing, hardy characteristics of the Boston Fern, and, like that plant, is equally suitable for house culture, and a much more beautiful plant for greenhouse and conservatory decoration. Every one who has seen it is charmed with it. As some one has expressed it, "There is nothing like Nephrolepis Piersonii in cultivation. In decorative effect it so far out-distances the original variety (the Boston Fern) that there is positively no comparison to be made." We consider it **the most valuable novelty that has been introduced in many, many years.** It has taken gold medals wherever shown. **Price, nice, strong, handsome plants, 40 cents each; very large plants with fronds three feet long (by express only), $1.00 and $1.50 each.**

Frond and Plant of the Pierson Fern.

The Queen of all White Roses

WHITE MAMAN COCHET

A Magnificent, New, Ever-blooming Tea Rose.

A grand new Rose of 1898. Identical with its parent, Maman Cochet, the queen of all pink garden roses, except in color of flower, which is snowy white, sometimes faintly tinged with the faintest suggestion of pale blush. It has the same freedom of bloom, magnificent form of buds and flowers, which is marvelously beautiful in its perfection. The flowers are large and very double, with petals of unusually heavy texture, making it of more than ordinary value in open ground. It has the vigor of an oak, with large, heavy foliage, which is impervious to disease. Hardy with protection; of extraordinary merit.

Duchess de Brabant.

This Rose combines exquisite perfume, beautiful coloring, and a matchless profusion of flowers and foliage. How shall we describe its coloring? Soft, light rose, with heavy shading of amber and salmon. Quite hardy, and in every respect it is admirable.

Striped La France.

(Madame Angeline Veysset.)

Striped La France combines all the good qualities of a La France in growth, fragrance, shape of bud and flowers; in fact, differs not from it except in color. It is nicely striped, the marking being plain and distinct, the variegation a beautiful bright rose on a satin-pink ground.

Scarlet Bedder.

This is without doubt the very best of all red Roses for bedding. It can be planted anywhere, being entirely hardy. Flowers are large size, fiery scarlet, a color rarely seen in Roses. Planted everywhere on account of its color and freedom of bloom.

CLOTHILDE SOUPERT.

The best of all pot Roses, literally loaded with bloom at every stage of growth. Color, beautiful pinkish amber, flushed with silvery rose with shades of salmon. A beautiful Rose.

MAD. SCHWALLER.

A Hybrid Tea having the fragrance of La France and the firmness of the Hybrids, with the freedom of flowers of the Tea class. Rosy-carmine, sometimes deep rose. A most abundant bloomer.

BURBANK.

A perfectly hardy, free flowering, ever-blooming Rose The flowers are double, of fine form, nearly three inches across. The color is a deep rose pink, shading to a beautiful soft rose at the center. The petals are well incurved, so that the center is hidden. In September and October the outer petals change to a deep, rich carmine. Delightfully fragrant.

Champion of the World.

Every one wants a hardy ever-blooming Rose. From early Summer until frost it can be depended upon to produce flowers in abundance; color rich glossy pink, delightfully fragrant, and such a strong, vigorous grower that it is almost invulnerable against attacks of insects; thus it is certain to be unequaled for the garden or cemetery.

HELEN GOULD.

(The Balduin.)

This is a most notable production—the strongest growing, freest blooming and hardiest Hybrid Tea Rose now known. In healthy, vigorous growth surpasses any we have ever seen. This grand new variety will unquestionably become one of the most famous Roses in cultivation. It is one of the largest and fullest of red Roses; long, plump buds, forming flowers of grand size and great beauty; sweet scented as "June Roses." A most valuable cut-flower variety, rivaling American Beauty. A rapid, abundant grower, producing great quantities of large, fine flowers.

STAR OF LYON.

(Etoile de Lyon.)

This magnificent Tea Rose is a rich golden-yellow; a strong, healthy and vigorous grower; immense bloomer, bearing flowers and buds early and late. The flowers are very deep, rich and full, excellent substance, very sweet. Surely one of the very best and most beautiful yellow Tea Roses for general planting ever introduced. Remarkably hardy, both as to heat and cold, frequently standing the Winters here uninjured in open ground without protection and blooming nicely through all the hottest part of the Summer.

We have the Best Seeds, both Flower and Vegetable, that Money will buy. The Best is none too good for You.

OUR THREE GRAND NEW PEDIGREE ROSES

"YOUNG AMERICA," "NESTOR," "ATLAS."

We have received many flattering reports from our patrons during the past season of the marvelous beauty of these three grand new Roses. One customer in the South writes that she has been buying and cultivating Roses for the past fifteen years and that our new Rose "Atlas" is the freest blooming and best bedding Rose she has yet bought, and that "Young America" and "Nestor" are decidedly the finest red and pink Roses she has in her extensive collection of 59 different varieties.

Our Glorious New Red Rose, "YOUNG AMERICA."

The grandest hardy ever-blooming Red Rose in the world, hardy everywhere. Blooms continuously. Bears flowers far superior to the famous Gen. Jacqueminot. Introduced and for sale only by Schmidt & Botley.

This magnificent new Crimson Rose is, beyond question, the peer of any Rose yet introduced. It produces in great abundance exquisitely formed, large pointed buds, which open into beautiful double blooms of delicious fragrance. The color of bud and full blown flower is a pure, deep scarlet-crimson, without a touch of purple in any stage of its development. The parentage of "America" would alone indicate its real worth. It is an offspring of two of the grandest and richest dark Roses heretofore sent out, viz: The well-known hardy, dark red Rose, "Duke of Edinburgh," and the equally well-known ever-blooming red Rose, "Meteor." "America" combines the good qualities of both these grand Roses, but is larger and produces more blooms than either of its parents. It is a strong grower, with handsome, dark green, leathery foliage, every shoot being crowned with a large, perfect bud of exquisite beauty. We own and control the entire stock of this magnificent new Rose, and would caution our friends that it cannot be bought elsewhere. **Price, for strong one-year-old plants, splendidly rooted, 20c; two-year-old plants, 50c.**

Our Grand New Hardy Ever-Blooming Pink Rose, "NESTOR."

Grandest Ever-Blooming Pink Rose Yet Introduced.

As "America" is the peer of any dark red Rose, so is "Nestor" the peer of any pink Rose yet disseminated. It is the offspring of two grand, well-known pink Roses, viz: "Magna Charta," the largest hardy pink Rose in the world, and the lovely new pink Rose, "Belle Siebrecht," the beautiful Rose which made such a furore among the Rose growers of five years ago. The progeny of such parents would alone insure extreme hardiness, strong growth and a matchless profusion of bloom. "Nestor" inherits the splendid qualities of both its parents, combining the extreme hardiness and strong, vigorous growth of "Magna Charta" and the extreme free blooming tendencies of the lovely "Belle Siebrecht." It throws up enormous canes, which are crowned with immense blooms much like "La France" in form, but approaching "Belle Siebrecht" in color, being a soft, solid pink. It is very fragrant and will be grown largely for its inimitable buds and faultless color. We own and control the entire stock of "Nestor," and warn our friends that it cannot be procured at any other establishment than ours. **Price, for strong one-year-old plants, 20c each; large two-year-old plants, 50c each.**

Our New Hardy Ever-Blooming Silvery Pink Rose—ATLAS.

This lovely Rose is a daughter of the acknowledged Queen of Roses, the beautiful and well-known "La France." This fact alone would place it in the very front rank of high-grade Roses. Like its illustrious parent, "Atlas" is quite hardy, but is a much stronger grower and produces five blooms to "La France's" one. It throws up long, quick-growing stems which are surmounted by long buds opening into large double flowers of two shades of pink exquisitely bright and fresh. The predominating color is light, silvery-pink and is exceedingly beautiful. We own and control the entire stock of "Atlas," and advise our friends and patrons that it can be procured only at our establishment. **Price, for strong, one-year-old plants, 20c each; large two-year-old plants, 50c each.**

THE WORLD FAMOUS ROSE.

AMERICAN BEAUTY.

This Rose has become as famous as the Marechal Niel. The flowers of this grand Rose are so eagerly sought that they sell in the flower stores of the larger cities during the holiday season at the extravagant price of from one dollar and a half to two dollars for a single bud or flower. Indeed, the market is never fully supplied with them, even at this high price. It is because of its large size, rich color and delicious fragrance. It is a hardy Rose, of the largest size, having the ever-blooming qualities of the Tea Rose, with the delicious odor of the Damask or Moss Rose. It is the sweetest of all Roses. In color it is a deep, brilliant red, shading to a rich, carmine crimson. American Beauty is like Marechal Niel, difficult to start from small plants, therefore we advise our customers to buy strong plants of it. This Rose will never be sold cheaply, for the reason it is hard to propogate.

American Beauty is hard to propogate but not hard to grow.

We can supply extra heavy field grown plants of American Beauty for $1.00 each. These are very fine.

AMERICAN BEAUTY.
For young plants, 20 cents each; two-year-old plants, 50 cents. We advise the planting of the larger size.

AMERICAN BEAUTY.

New, Hardy, Ever-Blooming Rose, CLIMBING CLOTHILDE SOUPERT.

For years Chlotilde Soupert has stood out as one of the greatest Roses in cultivation. It is our good fortune to introduce in this variety a climbing offspring of Clothilde Soupert. Climbing Clothilde Soupert has the same vigorous constitution of its parent, combined with its truly wonderful freedom of bloom and its extreme hardiness. In a single season small plants will grow 15 to 25 feet, producing cluster after cluster of the finest formed flowers. They are distinct, large, round, full and double, with beautifully imbricated petals, and deliciously sweet. The color effect is magnificent—ivory white shading toward the center to a silvery-rose. Cluster after cluster of flowers are produced throughout the entire season, and the bush at all times is literally loaded down with them. It needs no protection, having withstood with us a temperature of 20 degrees below zero in the open ground without protection. This is unquestionably one of the most important introductions of recent years. This variety will take its place among the great Roses, such as Crimson Rambler, Mrs. Robert Peary, etc. By all means include it in your order. Satisfaction is assured to all who plant it.
Price, 15c each; two-year-old plants, 40c each.

Order Your American Beauty early. We are always sold out before the end of the Season.

The Beautiful Kaiserin

NEW TEA ROSE

SNOWFLAKE

It is a lovely new white Tea—the freest flowering Rose we have ever seen. The rose was introduced by C. Strauss & Co., of Washington, D. C., and by them grown in large quantities for cut flowers, they claiming it the most profitable white Rose they grow; that they had counted 153 buds and flowers on one plant in a single day, and the plant less than a year old. **Nice young plants of this novelty for 10c each; large plants 25c each.**

THE BRIDE

This is undoubtedly the finest white Rose ever offered to the public, and we take great pleasure in recommending it to all our customers. It is a Rose that supplies a long-felt want. Marie Guillot

We consider this variety the equal, if not the peer, of any Rose of its color in cultivation. A trial will convince anyone that this endorsement is not extravagant. Planted everywhere on account of its color and freedom of bloom. **Price, 10c each; large two-year-old plants, 25c each.**

☞**We are often asked why it is we sell our large Two-Year-Old Roses so cheap. The reason is, we make a specialty of growing large size Roses. NOTE.—The above Climbing Roses are sports from the varieties for which they were named. The disseminators so named them for the reason that no greater praise could have possibly been bestowed on them than to name them in honor of the parent variety. These Climbers make lovely bush Roses by simply cutting off the running branches at any height your fancy may dictate. Many of our customers prefer them to the parent varieties for bush Roses, even if they do not wish Climbers, as they are of a much more vigorous growth than the varieties they are sports from. **Try them.**

THE LOVELY PURE WHITE ROSE

FRANCES E. WILLARD

A strong, vigorous grower, making handsome bushes. The bud and flowers are of the very largest size, pure white in color, so full and double and perfect in shape as to resemble a Camellia flower. The fragrance is delicious. There is nothing among white Roses to compare to it. It is by far the grandest of all white Roses. This we say without any hesitancy. It is a true ever-bloomer, belonging to the Tea Rose family. It was eminently fitting that we named this Rose in honor of the hallowed memory of the grandest of all women, FRANCES E. WILLARD, the great apostle of Temperance and Purity, the white Rose being the emblem of the society (W. C. T. U.) for which she gave her life. **Price, 15c each; large, two-year-old plants, 35c each.**

The Wonderful New Rose, Climbing Kaiserin, or

MRS. ROBERT PEARY

This is by all odds the most remarkable new Rose of recent introduction. It is an offspring of that grand variety, Kaiserin Augusta Victoria. The flowers are extra large, full, deep and double, and produced on long stiff stems. The buds are long and pointed, a remarkable feature not found in any other Climbing Rose. The color and shape of the bud and flower are identical with Kaiserin Augusta Victoria. Pure ivory-white. The fragrance is delicious. The most remarkable feature of this variety, however, is that it blooms continuously the first year. It grows to perfection outdoors, throwing up numerous shoots 10 to 15 feet high in a single season. **Price, 15c each; two-year-old plants, 40c each.**

Buds of Frances E. Willard.

Hardy Hybrid Perpetual Roses

OF SPECIAL MERIT

A SPLENDID LIST COMPLETE IN EVERY PARTICULAR. NONE BETTER. NONE SO CHEAP.

Hybrid Perpetuals are considered the most valuable of all hardy plants. They are distinguished by their vigorous, upright growth and large, bold flowers, frequently measuring five to six inches in diameter. When you plant Hybrid Perpetuals you may be quite certain of having Roses every year without further trouble. Though called perpetual, it must be understood that they are not such early and constant bloomers as the Ever-Blooming Roses. The Hybrid Perpetual should not be ordered for house culture, as they are not suitable for that purpose. Do not become impatient if your plantings of these do not bloom the first season. Give them a chance to become established. These Roses are especially suited to plant in all the Northern States and Territories; also in the colder parts of the States of Virginia, West Virginia, Kentucky, Tennessee, North Carolina, Arkansas, Missouri, etc.

Captain Christy

The flowers are of magnificent form, very double and stand erect in their martial bearing. The color is a fresh, delicate pink, with deeper shading in the center of the flower, the whole flower possessing a bright, satiny appearance. A desirable variety. Certainly the most beautiful Rose of this color we grow. It is a free bloomer. **Price, 15 cents each; large two-year-old plants, 30c each.** (See cut.)

It is the freest blooming white Rose we offer. **Price, 10c each; large, two-year-old plants, 30c each.**

PINK HERMOSA—**The Old Favorite.** Everybody knows this famous variety; as hardy as an oak, and always covered with its elegant clear pink blooms. This is the best Early White "Mum" we have in our superb collection.

MRS. HENRY ROBINSON.

In the entire Chrysanthemum family there is no grander white variety, no matter when it blooms; it is of the most popular style—immense incurving, broad channeled petals of great substance and the purest white—can be used a few days earlier, but it is a sin to cut it until the center petals have begun to develop; from a flat incurved form it gradually changes into a perfect ball of snow; foliage as handsome as that of Mrs. Jerome Jones; a variety of the easiest arrangement. We do not think it possesses a single fault. Winner of 26 first prizes. **Price, 10 cents each; three for 25 cents.**

We have the finest and most complete assortment of "Mums" in our city—cheapest too.

Two Magnificent Unequalled "Mums"

Golden Wedding, the Grandest Yellow, and Silver Wedding, the Grandest White. Price, 10 cents each, the two for 15 cents.

GOLDEN WEDDING

The grandest golden-yellow variety, and is the marvel of the period. Nothing can exceed the richness of its color; it is a remarkably vigorous grower, and has such strength of stem that it carries its great globular flowers erect, giving it a bold, majestic appearance. The form of the Golden Wedding is unique; the outer petals droop downward in picturesque irregularity; the center of the flower is built high with broad petals irregularly overlaid, so that, although the flowers are large, they are not heavy, solid looking, like many others. This grand variety has been awarded the highest honors wherever exhibited.

SILVER WEDDING

This variety is of mammoth size, of robust habit, with magnificent foliage, purest snow-white in color, very broad, heavy, deep flower, measuring fourteen inches in diameter. When the flower is several days old the outer petals curl and interlace. Probably the largest of all whites, and no doubt the very best. This charming variety has taken prizes wherever shown.

If you have room for only two good "Mums" Golden and Silver Wedding will fill the bill.

OUR EARLY FLOWERING CHRYSANTHEMUMS

We get many inquiries for Chrysanthemums that bloom early. For the benefit of those who want early "Mums" we here offer a very fine collection, embracing the choicest sorts and a wide range of color.

We will send the full set of Ten early "Mums" for only 50c. Any five for 30c.

Mrs. Henry Robinson—In the entire Chrysanthemum family there is no grander white variety, no matter when it blooms; it is of the most popular style—immense incurving, broad channeled petals of great substance and the purest white; from a flat incurved form it gradually changes into a perfect ball of snow; foliage as handsome as that of Mrs. Jerome Jones. We do not think it possesses a single fault. Winner of 26 first prizes.

Benj. J. Giroud—Is the richest deep crimson variety we have ever seen and excels in its color as Golden Wedding does in yellow. The color is of the richest velvety-crimson, which in the flower itself is soft and velvety-like. It is, without doubt, the best Chrysanthemum of its color. The flowers are enormous in size, while the color is the richest of all. Winner of nine premiums and certificates. Blooms in October.

Miss Kate Brown—One of the very finest of all the early whites, coming into bloom the first week in October; fully six inches across; a fine incurved flower, with broad petals; first-class disbudded, and also beautiful in natural sprays.

Mrs. J. C. Whildin—A handsome light yellow variety of splendid form. Took the Whildin prize at the Philadelphia show.

FLOWER OF MME. BERGMANN.

Mme. F. Bergmann—Still the finest of all the early whites; large in size; coming into bloom October 10th; excellent for pot culture for early flowers.

Miss M. E. McCowet—In this we have the loveliest of Chrysanthemums. The flowers are very numerous, always perfect in form and full to the center. Color the softest white, with a deep flush of pink through the outer half of the flower, curving over the center, sometimes tipping the inner petals.

Miss Dalskov—The latest and greatest acquisition to the Chrysanthemum world. We have thoroughly tested this grand new variety and we cannot say too much in its favor. We had single blooms last Fall that measured ten inches across. In color it is a beautiful pink, entirely distinct from any pink Chrysanthemum yet exhibited.

Ivory—Unexcelled for pot culture or cutting; pure white flower of exquisite form and finish. Has been shown in grand shape at all recent exhibitions; it is especially noticeable for its grand globular form, its dahlia-like petals and absolute purity of color.

Marion Henderson—We cut the first flowers on October 10th, several days before any other large yellow was ready, and had perfect flowers to cut a month later. This grand variety will be invaluable for early cut flowers, and, we believe, will occupy the same position among early varieties that Golden Wedding does among the late ones.

Triumph D'ex de Marseilles—Color, deep amber, shaded with a brown-yellow at the center. Very peculiar in form, having long, pendant lower petals, which droop down some three inches. Center high and full of nicely arranged petals.

The Big 4 Prize Winners

These are superb sorts as the photograph shows; very distinct in color and prize winners everywhere. Price, 10c each, the four splendid sorts, 25c

Columbia.

This variety won first at Chicago for best pink seedling lighter than V. Morel; it is a variety of exceptional beauty, especially in build, which is perfect; a rounded, incurved, the petals of which shine like mother-of pearl, while the base is a most pleasing shade of pure pink; the variety grows 4 to 4½ feet, has a stiff stem, good foliage, and produces blooms of the largest size. **Price, 20 cents.**

F. S. Vallis.

(Exhibition.) An immense Japanese flower; yellow, deepening to a fine citron shade. Long petals, twisting and reflexing into a broad, deep bloom as large as Mme. Carnot, and far superior to that variety and easy to grow. Extra fine. **Price, 20 cents.**

Louis Leroux.

(Exhibition and Commercial.) Color, clear nankin, shading to pale pink; one of the prettiest combinations that we have yet seen, reminding one of a beautiful sort called Incandescent. The flowers are bright cherry red, with white at the base of each petal; the two upper petals are dark crimson-maroon. The flowers are of immense size and very freely produced. It is this combination of coloring with blotches which obtained for it the title of "Pansy Geranium." **Price, 15c each. Four distinct varieties for 50 cents.**

New Double Rosebud Geranium

(Florets Like Perfect Rosebuds.)

The habit of growth is dwarf and compact, making this variety one of the most desirable for pot culture. The novelty and merit, however, is principally in the flower, the perfect trusses of miniature rosebud florets, which are wonderfully attractive and pleasing. The color is bright scarlet-flamed with purple shadings, and the substance most lasting. Certainly no Geranium in cultivation today is as distinct and we are certain this remarkable novelty will make a sensation. **Price, 10c each.**

FLOWERING BEGONIAS—Concluded.

Begonia Thurstoni.

NEW BEGONIA THURSTONI.

This Begonia is a cross between B. Metallica and B. San guinea, having the bright-red foliage and veinings underneath the leaves, and bright metallic green, shading to red in the younger growth on top, with the deep veinings of the Metallica and smooth glossy leaves and red stems of the Sanguinea; the flowers are a beautiful deep pink in bud, but when expanded become a beautiful shell pink. **Price, 10c each.**

NEW BEGONIA VERNON.

This elegant new variety is of unusual merit as a bedding sort, flowering fully as freely when planted out as when grown as a pot plant. It begins flowering when first planted and continues throughout the whole season until stopped by frost. Foliage rich glossy-green, often shaded deep bronze. It thrives everywhere and is destined to become one of the most popular of bedding plants. **Price, 10c each.**

WELTONIENSIS.

After you have begun your collection of Begonias with Rubra, Thurstoni, Dewdrop and Vernon, then let Weltoniensis come next. This is the most widely known of the species. If it were harder to grow, or more expensive, it would probably be more sought after. The leaf is delicate green in poor soil, but enrich it with a little old rotted manure and heavy velvety shadings of black appear on the maple-like leaves, every branch bearing its delicate bunch of rosy-pink bloom. May be bedded in Summer like McBethii. **Price, 10c each.**

Alba Picta.

BEGONIA RUBRA (Red.)

If you can have only one Begonia, let it be a Rubra, for it will prove a constant delight. It is so fast growing that it will in a year or two, reach the top of your window, sending up heavy stiff canes an inch in diameter, and rising beside them will grow, strong, slender branches, gracefully drooping under heavy, waxen leaves and pendant panicles of coral-colored flowers as large as a hand. Medium-sized plants are frequently seen with more than twenty such panicles at a time. Among the individual panicles you will find three distinct forms growing side by side. **Price, 10c each.**

WHITE RUBRA.

Alba Perfecta Grandiflora.

We doubt if there is a white flowered variety that equals it. The foliage resembles Rubra in shape, but is a lighter green, while the flower panicles are much handsomer. It is a pure white flowering Begonia of much merit. Try it. **Price. 10c each.**

Countess Louise Erdody.

New Rex Begonia

COUNTESS LOUISE ERDODY

The leaf has a metallic luster, dark-silvery in the center; shading to coppery-rose toward the margin. The striking peculiarity which distinguishes it from all other Begonias consists in the fact that the two lobes at the base of the leaf do not grow side by side, but one of them winds in a spiral-like way until in a full grown leaf there are four of these twists lying on top of the leaf nearly two inches high. **Price, 20 cents each.**

The New Grand Begonia

KING OF REX

Finest and largest leaved of any of the Rex family. Impossible to describe in words the beautiful markings of this magnificent Begonia. Cross between Begonia Diadem and a Rex variety, but retains in a marked degree the Rex character. **Price, 15 cents.**

LOUISE CLOSSON

One of the richest and most beautiful of the Rex family. The coloring is simply magnificent, center of leaf deep bronze with broad band of silvery rose, edged bronze, giving the whole leaf a purplish tint. The oddest color of all the Rex. **Price, 20 cents.**

MAD. RIVAL

Center shining silver with band of bronze green, dotted with silver, margined reddish bronze. Very beautiful. **Price, 20 cents each.**

Louise Closson.

GORGEOUS BEDDING TUBEROUS-ROOTED BEGONIAS

Have you tried our Superb Bedding Begonias? If you have not you should certainly plant at least a few this spring. THEY ARE GRAND. We have an immense stock and are selling them cheaper than you can buy them anywhere else.

Tuberous-Rooted Begonias.

TUBEROUS-ROOTED BEGONIAS

The Tuberous Rooted Begonia is the fashionable plant of the day, and richly does it deserve its honors. The very handsomest of our summer blooming plants, flowering throughout the season, and as fine and varied in their color as the Geranium family. They are splendid bedders, delighting in a light soil of wood earth, very old cow manure and sharp sand. See that the bed is in partial shade, and you will be delighted with the results. In the South, or where they cannot be planted in the shade of a house, a covering of burlap or canvas, some six or eight feet above them, merely to throw off the sun's rays, will allow them to come to absolute perfection, but they must have plenty of light and air. Do not allow them to become dry, and during hot weather they will take two waterings a day. When through flowering they can be dried off, shaken free of earth, and wrapped in cotton until February or March, when they may be started again.

Single, Separate Colors, white, scarlet, pink and yellow 10 cents each; six for 50 cents.

Double, Separate Colors, white, scarlet, pink and yellow, 15 cents; five for 50 cents.

This undoubtedly is the very best white Carnation grown today. Flowers are very large size and of splendid form, with strong stems holding the flower perfectly erect. The stem is faultless — perfectly rigid and very long.

PRES. ROOSEVELT (New)

Brilliant dark velvety crimson Strong, vigorous, very healthy habit. Flower is full and well fringed and of a very pleasing form, good fragrance. The color is magnificent and as rich and brilliant as the Cardinal flower, without the slightest tendency to turn black; in fact, no crimson carnation has ever come to our notice possessing such a vivid brilliant shade of color.

MRS. THOMAS W. LAWSON

The Celebrated $30,000 Carnation (New)

This famous and much-advertised Carnation is so well known that it is hardly necessary to describe it. This variety has created a sensation on account of its wonderful size and beautiful color—dark, cerise pink, lighting up beautifully under artificial light. It has been awarded five silver cups, two silver medals, and numerous certificates of merit.

GAIETY (Variegated) (New)

A beautiful new Carnation; color, scarlet and white variegated; has a stiff wiry stem, a perfect calyx, and is a very easy grower. It is not susceptible to any of the Carnation diseases.

DOROTHY WHITNEY (New)

A yellow of free-blooming habit; strong, vigorous plant, erect stems, finely formed flower of very large size; very free. Petals edged with a narrow band of light pink; almost a Picotte in marking. The flower retains its yellow color under artificial light, unlike most yellow varieties.

AMERICA (New)

A soft shade of scarlet. Habit, medium height with a compact growth. A fine sized flower, well formed, nicely filled, and not crowded with petals. Good calyx and long stiff stem. It is one of the early bloomers. Very free and of easy culture.

FLORIANA (New)

Another exceptionally fine pink Carnation. The color is a bright, clear, exquisite shade of soft rich pink, possessing no trace of purple or magenta. Fragrant, delightful. A strong grower and a free bloomer.

HER MAJESTY (New)

"The Queen of the Whites." It is the grandest white and the most prolific bloomer of the Carnation family that has been raised up to this time. The flower is of enormous size, full and double; has a good calyx; not subject to rust; under the most ordinary culture, produces good flowers throughout the entire season.

MRS. THEODORE ROOSEVELT (New)

Another grand Carnation, with enormous sized flowers, often measuring three and a half inches in diameter, at the same time being one of the freest blooming Carnations we have ever seen. Ground color of flower, cerise pink with scarlet shading at center.

PRES. McKINLEY (New)

This variety, like its parent, Dorothy, is wonderfully free; also very early, and is an excellent keeper and shipper. Color deeper and brighter than Lawson, with longer stems. One of the most promising novelties of the year. Winner of the $100 prize at Kansas City. Probably the best pink carnation yet out.

OUR MONSTER

AMERICAN WONDER LEMON

"SENT OUT BY SOME UNDER THE SPURIOUS NAME OF PONDEROSA"

LARGEST AND FINEST EDIBLE LEMON IN THE WORLD

- This Truly - Wonderful Lemon

WAS INTRODUCED for the first time to the public by us in the Spring of 1899. Since that time we have grown and sent out thousands to all parts of the country, and the reports we have received from our patrons in all quarters as to its productiveness and size is very flattering. It is truly a wonder, for no other Lemon ever produced such enormous fruit or bore so freely. The plants grow rapidly and make shapely trees in a few months. The fruit is very handsome as well as useful. May be used anywhere that ordinary Lemons may be used, and one of these is equal to eight or ten common Lemons. Highly recommended for lemonade and all culinary purposes. In addition to its fruit-bearing qualities it makes a very handsome specimen plant for house culture. The dark green foliage is very large and handsome, and the pure, waxy-white flowers with yellow stamens, are nearly as large as Tuberose blossoms and as fragrant as Orange blossoms, which they greatly resemble. We guarantee every tree to produce the same large fruit, no budding or grafting necessary. It is of the easiest culture, flowering and fruiting in any good, ordinary soil.

AMERICAN WONDER LEMON. (See letter below.)

PRICE: For very strong, young plants, from 2½ and 3 inch pots, 15 cents each, 5 for 50 cents; strong, handsome plants, from 4 inch pots, 25 cents each; large, two-year-old plants, fruiting size, 50 cents each; very large, handsome plants, of 7 and 8 inch pots, exceptionally fine fruiting size, $1.00 each.

NOTICE: We would call the attention of our patrons to the fact that some are sending out our American Wonder Lemon under the ficticious name of "Ponderosa." When ordering this marvelous Lemon, send to us. We introduced it; we have named it, and **We Have by far the Largest Stock in the World of this Splendid Lemon.**

BROWNWOOD, TEXAS, December 4, 1902.

SCHMIDT & BOTLEY, Springfield, Ohio:

I send you a picture of the American Wonder Lemon plant I bought of you in Spring 1901. It is a fine plant. I gathered from it today 10 Lemons which weigh from 1½ to 3½ pounds. Our cook says the 10 will make 120 pies. Truly the Lemons are wonderful. The plant is in every way satisfactory. F. M. G.

NOTE—The picture Mr. G. sent us is a beauty, showing the big, handsome fruit to great advantage. What Mr. G. has done you can do, if you buy your Lemon plants from us.

We could fill pages with these bona fide and unsolicted letters of commendation did space permit. "The proof of the pudding is in the eating." The proof of the genuineness of our claim that we have the most wonderful, the largest, the best, the most prolific and the easiest to grow of any lemon in the world is surely demonstrated in the statements of hundreds of our patrons from all parts of the country.

The BEAUTIFUL NEW ORANGE

KUMQUAT or KIN KAN

OUR PLANTS OF THIS GREAT NOVELTY ARE EXCEEDINGLY FINE

This unique and wonderfully beautiful Orange is a native of Japan, where it is known as the Kin Kan, which means gold orange, its other name—Kumquat—is Chinese for the same meaning. It bears in the most marvelous profusion little miniature oranges no larger than a Damson plum, of a rich golden color and glittering amid the dark foliage like burnished gold. The whole fruit, rind and all, is eaten, and people become very fond of them. The rind is sweet and the pulp agreeably acid, making a piquant combination. They are also delicious preserved and crystalized. The plants begin to bear just as soon as they have wood enough to hold the fruit, and are loaded with fruit and flowers every year. The branches are slender without thorns, the leaves narrow and oval, and the plant assumes a fine shape. As a pot plant it will create a sensation wherever grown. As a window plant for the North as well as for gardens in the orange region, the Kin Kan is one of the handsomest and most valuable ornaments. Diminutive trees in pots are loaded with fruit and flowers every year. The small, but exquisitely beautiful fruit hangs on the unique and handsome evergreen trees all Winter. **Price, for strong plants, extra large, from five-inch pots, 50 cents each; a larger size from six-inch pots, 75 cents each.** Must be sent by express.

Does not produce a bulb but is increased by suckers and is perennial. The leaf stalks are strong and tall, holding the mammoth leaves well above the ground. Perfectly immense, and makes a plant which for tropical luxuriance has no equal. Added to this wonderful foliage effect are the mammoth lily-like blossoms 12 to 15 inches long; snow-white, changing to cream, with a rich and exquisite fragrance so powerful as to perfume a whole garden. Plants bloom all Summer in the garden, or all the year round in pots. The foliage is so hardy that it will endure without injury frosts that kill other bedding and foliage plants. Not only is it the grandest garden or lawn plant, but as a pot plant it rivals the choicest Palms in foliage, to say nothing of its magnificent flowers. Thrives in any soil. **Price, 25c.**

SELECT HARDY PLANTS
SUITABLE FOR CEMETERY, LAWN AND GARDEN

Hardy perennials are those plants which die down in winter but start again in the spring from the root, lasting many years and flowering every year. Never before have they been so popular, and from present indications of a desire for hardy plants, the demand for them will continue to increase, which will make them as popular in the United States as they have been in the horticultural centers of Europe for many years. Some are very useful for screens, some for hedges, rockeries, steep banks and terraces, others for bedding, edging and bordering and cemetery planting: then again others are fine for cutting to be used for table decorations.

Cultivation is of the simplest, beginning with any good garden soil for a foundation, which may be enriched with any good fertilizer, such as well decomposed manure or bone meal. deeply dug, well pulverized, in which the plants should be set as early in the season as possible, so as to enable them to become well rooted and established before hot dry weather sets in, keeping the ground well stirred, and where it is not convenient to water the beds during hot dry weather, a mulch of any loose material which will keep the soil from baking will be found beneficial.

Coriander—Seeds are used for flavoring cakes, etc.; also in making of liquors and confectionery. **Price, 5c per packet.**

Marjoram, Sweet—The tender leaves and young shoots of this plant are used for seasoning during the Summer months, and are also dried for Winter use. **Price, 5c per packet.**

Rosemary—Leaves used for seasoning green in Summer and also dried for Winter. An old-time favorite, strongly aromatic. **Price, 5c per packet.**

Choice New Fruits and Novelties

Dwarf Juneberry.

Good fruit is one of the greatest luxuries a family can have, and those who have a chance to grow it should spare no trouble or expense to secure a good supply of the best sorts. We have carefully prepared a limited list of varieties which are perfectly adapted to all parts of the country. The trees we offer are young and thrifty, and will make a very rapid growth and bear quickly. **ALL FRUITS MUST BE SENT BY EXPRESS, UNLESS OTHERWISE STATED.** When offered by mail, postage is paid by us; if by express or freight, charges are to be paid by purchaser; but larger stock will be sent.

SPECIAL NOTICE.—As our Nursery is a separate and distinct department from our Greenhouse, it is necessary that all Fruit Orders be shipped direct from the Nursery, and we therefore ask customers to kindly keep fruit orders separate from the Plant and Seed Orders. Fruits will not be shipped with other plants. Prices on Fruits are placed very low, and we cannot allow them to be included in Club Rates, nor can they be taken as premiums. Price per 100 and 1000 will be given on application.

IMPROVED DWARF JUNEBERRY—A good substitute for the large or Swamp Huckleberry. The fruit is borne in clusters and is reddish-purple, changing to a bluish-black. In flavor it is a mild, rich, subacid; excellent as a dessert fruit or canned. **Price, 10c each; $1.00 per dozen, by mail postpaid.**

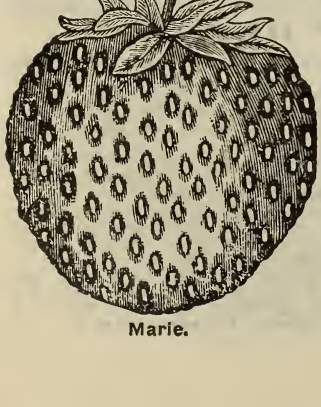
JAPANESE WINEBERRY—This interesting plant belongs to the Raspberry family. The fruit is borne in large clusters, and each berry is at first tightly enveloped by the large calyx, forming a sort of burr. For jelly making, canning and preserving, it is without an equal. **Price, 10 cents each; $1.00 per dozen, by mail postpaid.**

THE LOGAN BERRY—A Hybrid between the Raspberry and Blackberry. The fruit is as large as the largest Blackberry, and is produced in immense clusters. The color is a clear dark red. It partakes of the flavor of both the Blackberry and Raspberry—mild, pleasant, vinous flavor, delicious and peculiar to this berry alone. Seeds small, soft and few. Berries very firm and carry well. Strong grower, enormous bearer. Fruit ripens early, just after Strawberries. **Price, 20c each; $2.00 per doz., by mail postpaid.**

ROCKY MOUNTAIN CHERRY — (Improved Dwarf.) From the mountains of Colorado; hardy as a Wyoming sage bush. With its deep green willow-like leaves, mass of pure white flowers in spring and a load of fruit in summer, it is well worth cultivation for an ornamental shrub. Makes a bush four or five feet high, usually fruiting in two years, producing large quantities of jet black fruit about the size of English Morello, and ripening after all other cherries are gone. **Price, by mail postpaid, 25c each; $2.50 per dozen.**

STRAWBERRIES

MARIE STRAWBERRY — Beyond doubt the most prolific and profitable berry in existence today. In yield we will put it up against any new or old variety. In point of size and general appearance when placed on sale it has no equal. The blossom is imperfect; season same as Bubach and Haverland. Equally as large as Bubach, Glen Mary or Brandywine, and yielding with any variety in our 40-acre fruit plantation; besides, it is the most attractive in appearance when picked and ready for market of any in our collection. The berries are round as a ball, dark crimson in color; flesh dark, quality first-class, holding up in size to the very last pickings. **Price, 50 cents per dozen, postpaid; $1.50 per 100 by express; if by mail, 30 cents extra per 100 for postage.**



Marie.

SUNSHINE (Per.)—This is the great, late, fancy market Strawberry. The plant is healthy, strong, free running, with pistillate flowers and a marvelous yield. It produces from 5 to 7 times as many quarts as Gandy grown close beside it in our field. The berries are of fine size, bright color, high quality and great firmness. They ripen evenly to rich scarlet, with no white tops, and the flesh is red, sweet, and luscious all through. They start for market big and bonny, and get there as fine as silk. It makes your mouth water just to look at them, and the buyers walk right up and pay big prices. During the season of 1899 Sunshine Berries brought 18 cents a quart, when the best Gandys sold for only 10 and 12 cents. These practical market tests are the truest. Every grower knows what good money there is in late Strawberries of extra size and fine appearance. **Price, same as Marie.**

NEW YORK (Per)—This is the big fellow that won the $100.00 in gold which was offered in 1897 for twelve plants of any variety of Strawberry that would produce as much fruit of as large size and good quality as the Glen Mary. There were a good many new varieties put in competition for this prize, but none of them came anywhere near winning it except this big fellow which was named "New York" in honor of the State in which it originated. Growth of plant is very large and stocky, equaling in this respect the very largest. Season medium, color dark scarlet changing to crimson when fully ripe. Colors all over at once, no white or green tips. Usually perfect in shape and very productive and firm. The new York is a seedling of Bubach No. 5, fertilized with Jessie, and is one of the best varieties for hill culture. **Price, same as Marie.**

RASPBERRIES

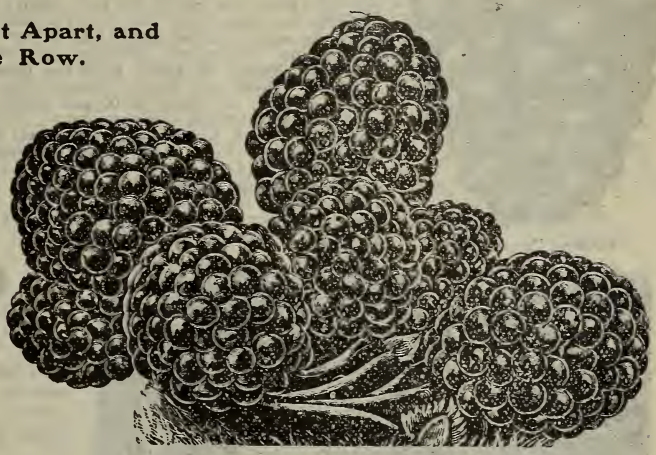
Plant in Rows Five Feet Apart, and Three Feet Apart in the Row.

50 plants at the 100 rate;
6 plants at the dozen rate.

All Raspberries furnished single and dozen lots by mail postpaid. If 100 or more are wanted by mail, add 40c per 100 for postage.

CUMBERLAND (Black Cap)—One of our very best growers has grown this variety for five years, and he says of it: "It is the largest, most productive, handsomest and best flavored berry I know of." Bush a strong, healthy grower. Ripens mid-season. **Postpaid 10c each; $1 per dozen; $3 per 100.** If wanted by mail, add 40c per 100.

MUNGER (Black Cap)—Single specimens measure one inch in diameter. Brings highest market price. Resembles Gregg, better flavored, excels in size, ripens 5 to 8 days later; extra fine for canning and evaporating; withstands drouth and hot sun. **Postpaid 10c each; $1 per dozen; $3 per 100.**



Cumberland—Very Productive.

CARDINAL—This new Red Raspberry is rapidly coming into favor, especially in the West. It is a very promising variety; a very strong, hardy grower, needing plenty of room; foliage holds on late, protecting canes until cured. Surprisingly productive; berries large, dark red, firm, rich flavor either raw or canned. Late. **Postpaid 10c each; $1.00 per dozen; $3.00 per 100.**

EARHART—Ever-bearing. Will bear in regular season and continues to bear until killed by frost late in the fall. A great novelty. **Price, 10 cents each; $1.00 per dozen; $3.00 per 100.**

PLANT HAYMAKER Raspberry

THE HAYMAKER is a purple cap, not so dark as Columbia or Shaffer, and much larger and firmer than either of those varieties, never crumbles, and stands up well in shipping. Sample crates have been shipped to distant points with entire satisfaction. It is a berry to grow for either home use or market. The originator has found it the most profitable berry ever raised for market, and has never yet been able to supply the local demand. So much of a favorite has the Haymaker become that local growers have said that it has ruined the sale of other varieties. Very popular as a canning berry. Many orders for berries for this purpose are placed a year in advance. One writer located near a canning factory has thus written: "If anyone about here had several acres of it in bearing, he could dispose of the entire crop to good advantage to the canning factory." We have had Haymaker on our own grounds fruiting for three seasons, and find it the most prolific of any variety ever grown. The past season we picked from ¼-acre of 1-year plants 50 busheds of fruit, which sold in market from $3.00 to $3.75 per bushel. We advise each and every one of our customers to try this valuable new sort. **Price, 10c each; $1.00 per dozen; $3.00 per 100.**

KING—The earliest Red Raspberry on record. It is the early Red Raspberry that makes the big money—often sell for 25c per quart. You want to add this one to your collection. It is thus described by H. E. Van Deman, the well-known pomologist and horticultural writer, of Parksley, Va.: "Round, medium size; light crimson color; moderately firm and of excellent quality. A seedling of Thompson, and ripens about the same time, but larger and more productive." [Note that Thompson has for years stood as the earliest of Raspberries, red or black.] Mr. Van Deman is certainly impressed with the value of this variety, as we have heard him refer to it in conversation and public addresses as about all that can be desired in the way of an early Red Raspberry.

Ohio Experiment Station, Wooster, Ohio.

The King Raspberry is fine, indeed. Large, firm, beautiful color and prolific. It is far ahead of Loudon or Miller here.

BISMARCK APPLE—Bears fruit on two-year grafts. Finest quality, finest color, dwarf and extremely prolific—most suitable Apple for hot climate, yet the hardiest known. Wherever grown it has proved a most startling revelation not only in high quality, but also in hardiness and especially in earliness of fruiting. The tree is of stocky, short growth, and when laden with handsome fruit a one or two years old, is very desirable as a pot plant, for table or greenhouse decoration. Fruit is large, brilliant color, and very handsome. Flesh tender, pleasant subacid, of distinct and most delicious flavor, unequalled as a desert apple and very superior for cooking, and will keep in an ordinary room till March. **Price, by express, first class, 40c each; $4.00 per dozen; mailing size, postage paid, 25c each or $2.50 per dozen.**

OPALESCENT—The New Century Apple. All who have examined the Opalescent regard it as the handsomest Apple grown. It is not only highly colored, but susceptible of a very high polish, reflecting objects near it like a mirror. This feature makes it a highly prized sort for fruit stands. The flesh is yellowish, tender, juicy and good size, large to very large, and color light, shading to very dark crimson. Season December to March. **Price, large size, 75c each, by express only. Mailing size, 40c each; $4.00 per dozen.**
